

## Introduction

### A thought about learning Taxidermy

**Taxidermy** is a profession or a trade unlike any other. Your customer trusts in your ability to preserve and recreate the memories of their trophy adventure. From the big game adventurer to the weekend fisherman, it is your skill and dedication to the art and mastery of taxidermy that will provide and preserve the satisfaction for choosing you, the professionally trained taxidermist. The lasting memory for your customers is in the years of enjoyment for their sound decision in choosing the best-trained Taxidermist to preserve their trophy.

In learning the art of taxidermy with **Anglers Artistry™** or any one else, consistency and repetition are the keys to success. It is my belief that complete guidance is the advantage in learning the correct way to make money and turn out a superior product.

The average person can achieve a comfortable level of success and working knowledge by learning a specific area of taxidermy at a top notch professionally run taxidermist workshop with proper discipline and time. With a hands-on education, you will save years of wondering, “Am I doing this correctly”, “Is my work as good as it could be?” A professional education is positively the fastest and most satisfying direction in your pursuit of a career in taxidermy.

In the beginning years of owning your own taxidermy business, it is critical to win your customers over! This means your best work you can give to them from day one! That means great quality, professional turn around time, and a fair and profitable pricing structure. The head start you will need to be successful in the world of taxidermy comes from a professional education! If you choose the wrong road to your taxidermy career, you just may end up being part of the unsatisfying experience that many unprepared taxidermists find themselves being a part of by having to work hard for many years just to salvage their damaged reputations. This all comes from not having the advantage of a proper taxidermy education.

It makes sense that without the advantage of a solid taxidermy education, you may find years of dissatisfaction and aggravation due to the slow road to taxidermy that prevents you from having fun and making money. Many experienced taxidermists will tell you first hand that, **“You have only one opportunity to impress a potential customer with your ability and professionalism.”**

**Anglers Artistry** offers a variety of custom one on one courses and seminars for today's beginner to the advanced fish artist. Each 1 on 1 workshop is custom designed for your level and need for instruction. Your customers expect satisfaction in your efforts and out come for their trophies. Satisfaction is expected and necessary with your education. Every workshop offered at Angler's Artistry will be laid out in a comprehensive manner for you and your learning style to assure the best possible outcome for your experience.

Every student is afforded the personal attention that only a **one on one class** can offer. The **Angler's Artistry** students have gone on to be not only successful taxidermist but also profitable business people. This is due to the system set forth by the teaching methods of **World/National Award Winning Taxidermist and Judge Richard Krane**. Past students have gone on to charge upwards to \$24.00 per inch for their commercial fish work! Other students have won Best in World/ National Champions and countless Best of shows, Best of Categories, President Challenge Cups, and multiple Blue ribbons! Many students presently are certified Judges. A proven track record of satisfaction and success!

We don't Rush your Education! You will work at a pace that is good for you!

My reputation means every thing to me, and yours should to you! As a Taxidermist you are only as good as the last trophy that goes out the door, as an instructor, I am only as good as the last student I successfully teach! I have had the opportunity to instruct and become friends with some great taxidermist and people of all ages and backgrounds. From beginners who have never held a fish, to the most serious competitor, I have been ably to work at continually providing the best and the most soundly consistent techniques which produce great results time in and time out.

Let me provide you with this same opportunity and I'll give you the best I have to offer! I take personal pride in each and everyone of my students! There reputation means as much to me as my own. If you need additional references or would like to speak to past students please let me know how I can help with your future education.
